EXAMINER'S AMENDMENT

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 8 April 2011, Sudhir G. Deshmukh (Reg. No. 33,677) requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 04-1928 (E.I. du Pont de Nemours and Company) the required fee of \$130.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification, after the TITLE OF THE INVENTION, the following paragraph has been inserted:

CROSS-REFERENCE TO RELATED APPLICATIONS

This application is a national stage entry under 35 U.S.C. §371 of PCT/US2005/24387, filed 8 July 2005 and published as WO 2006/017197 A1, which is a continuation-in-part of 10/889,571, filed 12 July 2004, now abandoned.

Art Unit: 1715

In the Claims, claim 1 has been amended as follows:

Claim 1 (currently amended) A process for the production of special effect multi-layer coatings ~~having problematic color shades~~ consisting essentially of the successive steps:

- (1) applying a 10 to 30 μm thick base coat layer onto a substrate provided with an EDC primer,
- (2) applying a clear coat layer onto the base coat layer, and
- (3) jointly curing the base coat and clear coat layers to produce said special effect multi-layer coatings ~~having problematic color shades~~, ;

wherein the base coat layer is applied in a first and second layer,

wherein the first layer comprises a modified water-borne base coat produced by mixing an unmodified water-borne base coat with an admixture component and the second layer comprises the unmodified water-borne base coat,

wherein the unmodified water-borne base coat has a ratio by weight of pigment content to resin solids content of 0.05:1 to 0.6:1 ~~[[and]]~~,

wherein the pigment content of the unmodified water-borne base coat comprises 0.1 to 2 wt.%, relative to the resin solids

Art Unit: 1715

content of the unmodified water-borne base coat, of at least one metal flake pigment having a thickness of 10 to 80 nm and at least one additional special effect pigment, and

wherein the composition of the pigment content is such that UV light transmission through the base coat layer formed of the modified water-borne base coat and unmodified water-borne base coat is less than 0.1% in the wavelength range of from 290 to 380 nm and less than 0.5% in the wavelength range of from 380 to 400 nm.

Claim 4 (currently amended) The process of claim 1, wherein the pigment content consists of 50 to ~~[[100]]~~ 99.9 wt.% of special effect pigments and of 0 to 50 wt.% of at least one pigment selected from the group consisting of white, colored and black pigments.

Claim 5 (currently amended) The process of claim 1, wherein the pigment content consists of 98 to ~~[[100]]~~ 99.9 wt.% of special effect pigments and of 0 to 2 wt.% of at least one pigment selected from the group consisting of white, colored and black pigments.

Allowable Subject Matter

2. Claims 1-9 are allowed.
3. The following is an examiner's statement of reasons for allowance: The closest prior art has been made of record and the instant claims distinguish the instant invention there-over as set forth under this heading in the prior Office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. US 2004/0028822 A1 is made of record but fails to teach or suggest the combination of a first, modified base coat layer and a second, unmodified base coat layer. Rather, both layers are modified within the context of the invention. Further, this references fails to teach or suggest the claimed pigmentation.
